

'You live a new life for every language you speak. If you only know one language you only live once.'
– Czech proverb

Following the National Curriculum, Spanish is explicitly taught from years 3-6 to *'provide an opening to other cultures'* using 'Language Angels'. Language Angels supports teachers to ensure successful foreign language lessons are available to all pupils by providing interactive resources, games and ongoing CPD support to help all teachers deliver a successful Spanish curriculum. Each unit has a range of self-correcting, fun and stimulating interactive games which slowly builds and revisits knowledge over time to make it stick. Songs and raps are provided to consolidate learning as well as ensuring that the Spanish language and vocabulary that is taught remains in children's long-term memories.

Spanish is the chosen language as this is also the language being taught in all of our secondary feeder schools- hence giving our children an advantage in the next stage of their education. Being taught to learn a new language builds a deeper understanding of decoding, grammar and language structures. Teaching languages is helping to raise aspirations and open the eyes of our children to the range of languages spoken in the world in which they live. We want our children to be curious about the world around them, have the ability to communicate with others and have an increased understanding of different countries and cultures.
